

The following 19 companies have confirmed having a display at IMI's **6th Annual Security Printing Conference** on November 16-18, 2009 at the Sheraton Baltimore City Center Hotel, Baltimore, Maryland - **Register Now at www.imiconf.com**:

ChemImage

Learn about Hyperspectral Imaging & the new HSI Examiner 100 QD System for questioned document examination.

Eastman Kodak

Visit Kodak at IMI's Security Conference to learn how to design a comprehensive brand security strategy.

Foster & Freeman

Foster & Freeman will be demonstrating their VSC6000, the standard instrument for forensic-level examination of documents and security features.

FUJIFILM CORPORATION

FUJIFILM's will be displaying their new security label and its technology, named "Forge Guard" - Forge Guard is categorized in "Covert Type" security labels and shows its specific feature as "Full-Color Covert Type Label" that has been never developed.

H. W. Sands

H.W. Sands Corp. will be displaying various Innovative new technologies in security which can be implemented for anti-counterfeiting for everything from documents to packaging and more.

Heidelberg USA

Learn how Heidelberg is incorporating security features into the mainstream printing world.

InData Systems

Find out how to utilize invisible barcodes and all the real world issues to be addressed in effectively implementing a cost effective system.

Methode Electronics

See operating ink jet printer that allows engineers to create functional electrical circuits with a thermal inkjet desktop printer with Methode's water-based 9101 conductive ink.

NPC, Inc.

Polyonics

Discuss how Polyonics can easily integrate product authentication features into existing WIP barcode data collection systems - on-line & in real-time - during the products' manufacture.

Prime Genetics

Prime Genetics provides industry leading covert security features through its innovative Molecular Encryption authentication system – they can deliver a unique solution that is cost effective & secure.

Schenk Vision

Schenk Vision's EasyInspect offers quality control and production process monitoring for all web materials including optical film, plastic, paper and labels.

Seybold Report

Receive a sample copy and a \$100 discount coupon for the revamped Seybold Report - now the definitive & independent source of information about the technologies used for publishing & printing.

SICPA

Meet with the leading global providers of security ink and solutions for the authentication of banknotes, value documents and products, as well as providers of integrated secure track and trace systems.

Treibacher Industries

Troy Group

Meet with a worldwide leader of secure on-demand printing solutions – Troy offers application software, security printing hardware and specialized consumables for securely printing checks, money orders, transcripts, prescriptions and other important documents.

Tullis Russell

See Tullis Russell Coaters' full line of security paper and label products sold under the brand heading "TRU-Security" - product applications include tamper-evident/brand protection labels, tax stamps, postage stamps, travel visas, passports, tickets, vouchers, lottery scratch off, phone cards plus a full array of custom applications for low, medium or high security paper & label needs.

Vorbeck Materials

Learn how Graphene based Vor-ink™ products can be used in security applications and identification labeling.

Xennia Technology

Discover how Xennia combines innovative chemistry and first class engineering to provide integrated inkjet systems and inks to implement unique security solutions.

And if you want to inform others of your products, technology or services – **Display Space is Complimentary** – There is no fee other than the conference registration fee to have a display space and to give a 5-minute presentation during the popular **Suppliers' Forum** session. **Register Now at www.imiconf.com** or contact Al Keene at al@imiconf.com

We urge you to attend this year's conference and learn how to prosper from today's opportunities in the growing security and anti-counterfeiting printing markets.
