Company Description

Spectra is a leading developer and manufacturer of piezo-electric (PZT) ink jet printheads and related consumables and accessories. Spectra has developed significant proprietary drop-on-demand ink jet printheads capable of producing high performance digital images in a wide variety of printing and fluid jetting applications. Spectra invests heavily in research and development, maintaining one of the most capable ink jet R&D groups in the world with over 70 staff members. Manufacturing is a core competence at Spectra with many years of experience and thousands of printheads installed worldwide.
